DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a security system, classified in class 292, subclass 261.
 - II. Claims 2-4, drawn to a seal pin, classified in class 70, subclass 327.
 - III. Claims 5-8, drawn to a security cover, classified in class 70, subclass 56.
 - IV. Claims 9-11, drawn to a tool, classified in class 81.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination claim recites a broad subcombination (Bbr) while the subcombination claims recite specific details (Bsp) not recited in the combination claims. The subcombinations have separate utility such as use with a different security system.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III or Group IV, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3676

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
